

UF Water Vending Machine

Introduction

Ultra filtration is a membrane process that is commonly used to remove suspended or dissolved solids from process liquid. With 12 years production experience, Pukui provides ultra-filtration drinking water vending machines with great appraisal from our clients. It is mainly composed of ultrafilter, powder coated steel cabinet, coin acceptor, bill validator and system board. This automatic water vending station is equipped with a water purifying system which can ensure fresh, clean and good water quality. It accepts coins and bills from different countries.

Operation and Maintenance Attentions

1. We need to know the source water quality and choose an ultra-filtration drinking water vending machine with right water production capacity.
2. Our company provides one year warranty for the broken parts of this water vending station and offers excellent after-sale service.

Packaging and Transportation

We package ultra-filtration drinking water vending machines in carton for ordinary order. For bulk order, we use polywood cases for sea or air transportation.
